

SLAM Solutions Inc. Announces Oracle Support for Change Management Control

SLAM Solutions Inc. (<http://www.slamsolutions.com>), makers of web based software tools, announces support for Oracle databases as a backend for Change Management Control, a component of the SLAM Management Control Suite.

Las Vegas, NV, March 11, 2008 – In its continuing efforts to enable support for its Change Management Control, Help Desk Control and Asset Management Control software across a wide range of environments, SLAM Solutions announces support of Oracle as a backend database option.

Clients may now opt to enable Oracle 9.x and above as the backend database to its SLAM Software system. Moreover, clients already utilizing other software systems with Oracle databases 9.x or above can have this data migrated easily over to the SLAM Change Management Control system. This migration is included at no charge as part of the set up of a SLAM Management Control system.

Offering the Oracle backend database option is a huge enhancement to the Change Management Control software commented Mazhar Pathan. “For our clients operating in Oracle shops, they will benefit from the speed, size and security that is inherent in all Oracle products combined with the strength and stability of Change Management Control.”

Along with support Oracle databases 9.x and above, Change Management Control also offers support for SQL Server 7, SQL Server 2000 and SQL Server 2005; as well as Microsoft Access.

Complete Technical Specifications for installing and operating SLAM Change Management Control include:
